## ABOUT ME

I've been a graphic designer for a few years and decided to get into web development. I've created and maintained multiple webstores for different companies, and I enjoy the process. I earned certificates through SheCodes to learn web development, and I feel confident in my progress. I prioritize having good relationships within the workplace, and I'm looking to join a team of like-minded people who embrace honesty, respect, communication, and innovation.

## EXPERIENCE

Graphic Designer - New Era Grafix  
June 2019 - Present

I am the lead graphic designer working with our biggest clients to create promotional items for their businesses. Some of my responsibilities include communicating with clients, working in tandem with other departments to ensure accuracy and efficient communication, creating and maintaining e-commerce stores, training new designers, working with sister companies, local and overseas production facilities, and more. I have designed templates, customized textiles, and I frequently design, print, and assemble banners, signage, stickers, and digital transfers for heat pressing.

Embroidery Machine Operator - New Era Grafix  
September 2018 - June 2019

I stitched logos and personalizations onto almost any garment or bag using an 8-head and a 6 head Tajima professional embroidery machine. This required accuracy, attention to detail, and speed. Some of my responsibilities included troubleshooting mechanical problem, machine maintenance and cleaning, repairing damaged garments, and inspecting products for irregularities, imperfections, and quality concerns. Working in this position and assisting other departments helped me gain an understanding of production that still benefits my position in the company today.

Assistant Webmaster - Forest City Surplus  
September 2017 - September 2018

Managing products, editing SEO on our website, product photography, advertisements and marketing, radio ads, and weekly email newsletters were my main responsibilities in this position. I worked with our purchaser to choose new products, with other departments to gain knowledge on our inventory, wrote copy for each product, took photos, and created web pages to display them.
